

PREVIEW

PROLOGUE

My name is George L. Cook III.. I am an African American who is a registered Democrat that leans independent. I guess that makes me an Afdemdemt. Hey if Tiger Woods can make up names to call himself so can I.

The fact that I am a democrat may surprise some after reading the title of this booklet.

Some may ask why I have written this.

That would be because as one who has been involved in politics and now sits on my local school board I believe that Democracy works best when both parties can be held accountable. The only way to hold any politician accountable is with your vote.

If our elected officials become comfortable and start to believe that they will easily become reelected simply because of their party affiliation we all suffer.

In many African American Communities democrats have almost if not exclusive control over all elected offices. In some communities they do a great job in other especially our major cities the results have ranged from mediocre to downright devastating for the Black Community.

Many elected officials have simply not kept their promises and with little threat of losing an election why should they. They are rewarded again and again with reelection regardless of the job they have done.

Now this is not about just bashing democrats. Many have done a great job when it comes to civil rights and advancing issues that pertain to African Americans.

This booklet is about bashing both democrats and republicans.

Why bash the Republican Party? (On this issue you should be asking why not)

Because where the Democratic Party has in some ways failed the Black Community at least they were there. The Republican Party has turned it's back on the African American Community.

A huge mistake.

In the pages ahead I will try to offer some insight into how African Americans think of the RNC and offer some ideas on how the Republican Party can make inroads with the Black Community and bring more balance to the political process. This will greatly benefit Black Communities because choice is important to our democratic process.

Now I'm going to share with you in a few pages and for 99 cents a few ideas that political advisors and campaigners might charge thousands for. A few things that can make a big difference.

Now of course to learn that you will have to buy the rest of the book.
